ALUMINIUM VS STEEL TRACK (AT/ST)

We provide two options for the track of the Aislesaver track, an aluminium track (AT) and a steel track (ST). Receiving the correct track for your use is imperative to ensure that you get the most out of your investment. Our sales team will ensure you get the correct track type to suit your requirements, however, it is still important to know the differences between track types.

Aluminium Track (AT)

- Sits on top of the floor
- Easily relocatable
- Perfect fit for offices

Steel Track (ST)

- Robust track
- Fitted into the floor
- Capable of moving larger systems and larger loads
