DESK SCREEN

Norba workstations have two desk screens dependent on which Norba model is selected.

Both desk screens are produced with either side of a composite board covered in coloured fabric, with an aluminium alloy core. The total thickness of the desk screen is 23mm.

The standard desk screen is attached through two bolts underneath the desk, where models with a middle cabinet have specialised clips attached allowing it to connect to the workstation.

Fabric Colour Options:

ACCESSORIES

WIRE BOX ON DESK:

The OLP wire box is made from ABS plastic and gets attached to the top of the Norba workstation, giving users direct access to cable ports below.

PRODUCT	MATERIAL	DIMENSIONS (MM)	HOLE SIZE (MM)
A26 Cable Box	ABS Plastic	300*120	290*110

METAL CABLE TRAY:

This metal cable tray is made from 0.7mm cold rolling plate which is powder coated with a sandy finished. It is affixed underneath the Norba workstation and is used for cable management, keeping an active workstation looking clean and refined.
